

Scenario 4: Recommended CDE Development Model

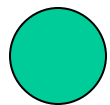

Scenario 4. Cancer centers and scientists are responsible for proposing new CDE concepts in the CDE development process. CDE administration is then carried out by a designated group from the respective Domain Workspaces, in conjunction with the V/CDE Workspace. The final review, harmonization and acceptance is carried out by the V/CDE Workspace, along with the NCI.

Scenario 1: Domain WS - Centralized

Scenario 1. Each cancer center is responsible for term creation necessary for CDE development. CDE administration is then carried out by a selected group from the respective Domain Workspace. The final review, acceptance and harmonization is carried out by the V/CDE Workspace.

Domain Workspace

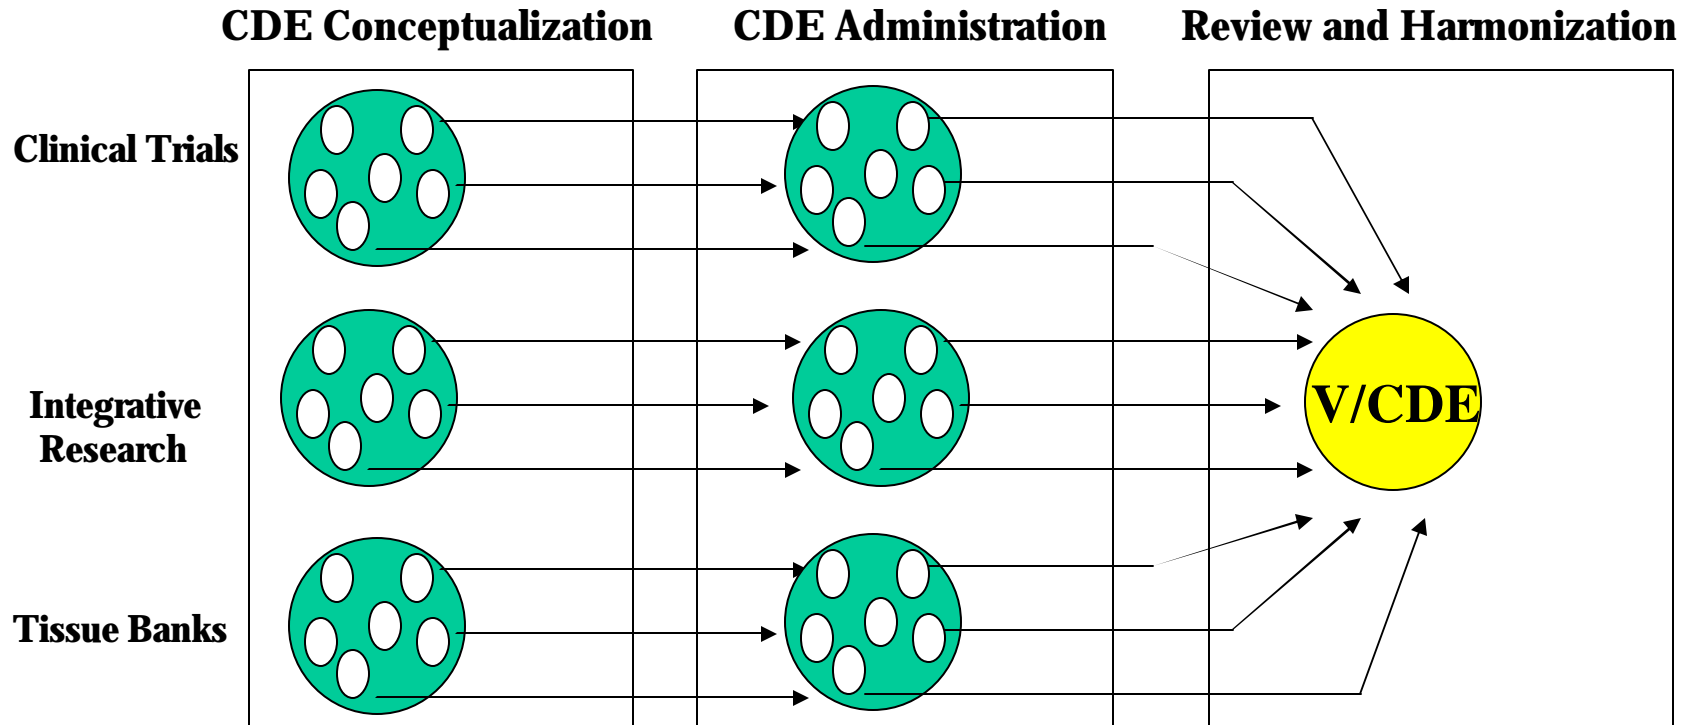

Vocabularies and Common Data Elements Workspace

Individual Cancer Centers within Workspaces

Scenario 2: Domain WS-Distributed

Scenario 2. Cancer centers and scientists are responsible for proposing new CDE concepts in the CDE development process, as well as providing CDE administration. The final review, acceptance and harmonization is carried out by the V/CDE Workspace, along with the NCI.

Vocabularies and Common Data Elements Workspace

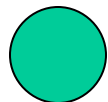

Individual Cancer Centers within Workspaces

Scenario 3: V/CDE WS-Centralized

Scenario 3. Cancer centers and scientists are responsible for proposing new CDE concepts in the CDE development process. CDE administration is then carried out by a designated group from the V/CDE Workspace in cooperation with the respective Domain Workspace. The final review, acceptance and harmonization is carried out by the V/CDE Workspace, along with the NCI.

Domain Workspace

V/CDE Workspace responsible for CDE administration for each Domain Workspace
